

# ISR - 52nd International Symposium on Robotics

In conjunction with:

[automatica-munich.com](http://automatica-munich.com)

**VDE**

ISR 2020 is organized by

# Present your technology at the ISR 2020!

Attractive package deal to showcase your brand in the major digital event during the “week of automatica”.

As automatica 2020 was canceled as an in-person event, a number of digital formats will take place during the originally planned duration of the show from 8 to 11 December 2020. The International Symposium on Robotics (ISR), now in its 52nd edition, will be offered in a digital format. To find out more, visit the conference’s website at: [www.isr-robotics.org](http://www.isr-robotics.org)

New in 2020: We are offering a **BUSINESS TRACK** for the first time. This business track will provide the only opportunity for robotics companies to present their technology, products and brand during the “automatica week”.

The package includes:

1. A 30-minute presentation slot for your technology – the focus should be on technical innovation and/or novel applications
2. Listing of your company as sponsor of ISR 2020 (logo displayed on the ISR website)
3. Possibility to upload your company video (max. duration 5 minutes)
4. A virtual B2B-networking zone, in which ISR participants / the audience of your presentation can get in direct touch with you.
5. The option to upload your presentation so that interested viewers can stream it also after the conference

Please note: Whereas the other conference tracks are only accessible to paying conference participants, the presentations of the Business Track will be completely **OPEN** and **FREE** to watch. This will vastly increase the global reach of your presentation.

Price: The complete package is available for **EUR 1.500**
